

Exercises Session 1: Introduction

Exercise 2.1

For the exercise, see the book.

Hint: Get the file 'MathHmwk.txt' from github and read it into R:

```
Math.data <- read.table("MathHmwk.txt", header = TRUE)
```

Exercise 2.2 (Book)

You can copy this to get the correlation matrix for the Highschool data into R

```
HighSchool.cor <- lavaan::lav_matrix_lower2full(c(  
  1.000,  
  0.178, 1.000,  
  0.230, 0.327, 1.000,  
  0.106, 0.245, 0.183, 1.000,  
  0.195, 0.356, 0.721, 0.178, 1.000  
)  
)  
rownames(HighSchool.cor) <- colnames(HighSchool.cor) <-  
  c("Race", "SES", "CognAb", "SchoolTy", "AcAch")
```

Exercise 2.3 (Book)

Covariance matrix for the MacKinnon data:

```
MacKinnon.cov <- lavaan::lav_matrix_lower2full(c(  
  84.85,  
  71.28, 140.34,  
  18.83, -6.25, 72.92,  
  60.05, 84.54, 37.18, 139.48  
)  
)  
rownames(MacKinnon.cov) <- colnames(MacKinnon.cov) <-  
  c("TeachExp", "SocCli", "MatCov", "StudAch")
```
